Just DON'T
Question Evolution!!

the cell requires over
1,000 processes to stay
alive - if you're going to
have life - all of those
must evolve at our
time = oooops

Wonderful exhibit
sensitive and objective
I respect the theory

Sorry, but the Cambrian
Explosion basically kills the
theory. Not to mention the
fossil record, or the lack
of feasibility of practical
evolution even in single-cell
organisms. The classic
theory predicting that recent
organisms are trillions to one.

Darwin's evolutionary
theory is the only the-
ory backed with sound
scientific data. Evolution
can be seen on micro-
and macro level.

 - alternatively, you may want a few main points appearing one by one. . .

Question Evolution!!
the cell requires
1,000 processes to stay
alive - if one is gone -
no life - all 1,000+
must evolve at the
same time = impossible

lack of feasibility of practical
evolution even in single-cell
organisms. It's like so
astronomically against the classical
theory, and even your current
adjustments have led to one.
